TO: Minerals File

FROM: Lynn Kunzler, Reclamation Specialist

RE: Site Inspection, Danny Bown, Nine Mile Project, S/039/010, Sanpete County, Utah

Date of Inspection: September 12, 1996

Time of Inspection: 12:50 p.m.

Conditions: Partly cloudy, warm

Participants: Lynn Kunzler, DOGM

Purpose of Inspection: To document current site conditions

Mr. Bown has constructed his road going up through his quarry site. On the vehicle odometer, this road is 1.5 mile long by an average of 12 feet wide. The quarry itself averages 70 feet wide and is 240 feet long. This site stands at about one acre of disturbance.

Everything seems to be stable. There was a backhoe here. Several photos were taken to document the site conditions.
